3.2 B.Eng. in Civil Engineering	13
3.3 B.Sc. in Construction in Construction Health and Safety	14
3.4 B.Sc. in Construction in Construction Site Management	15

School of the Built Environment

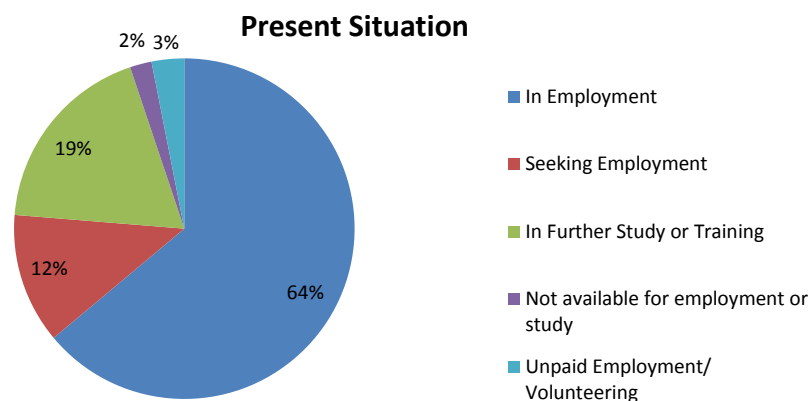

1.0 Introduction

This report presents detailed information on the First Destinations of Limerick Institute of Technology, School of the Built Environment graduates of 2011. The results provide an important indication of graduate trends over a period of remarkable change in the Irish economy, most particularly for the Construction Industry.

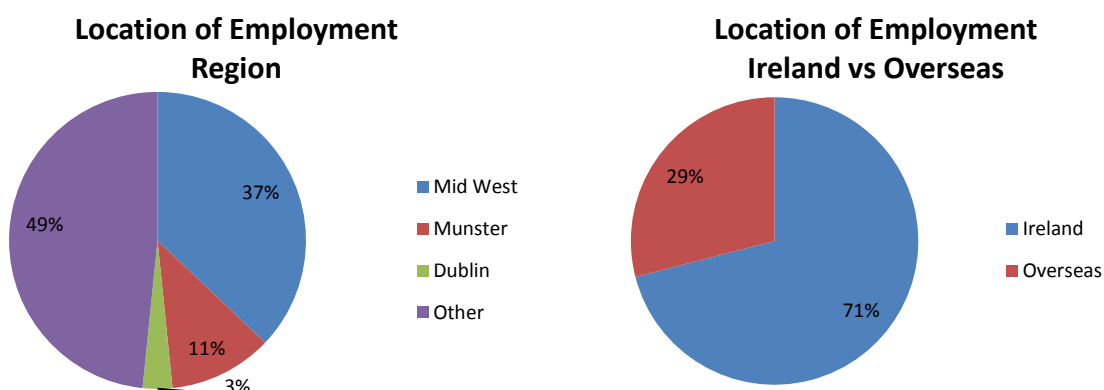

The results from the School of the Built Environment, reflect the employment and further study patterns of 229 graduates of full-time Higher Certificate (Level 6), Bachelor Degree (Level 7) and Honours Degree (Level 8) programmes. The rate of response was 42%.

1.1 Overview of Results

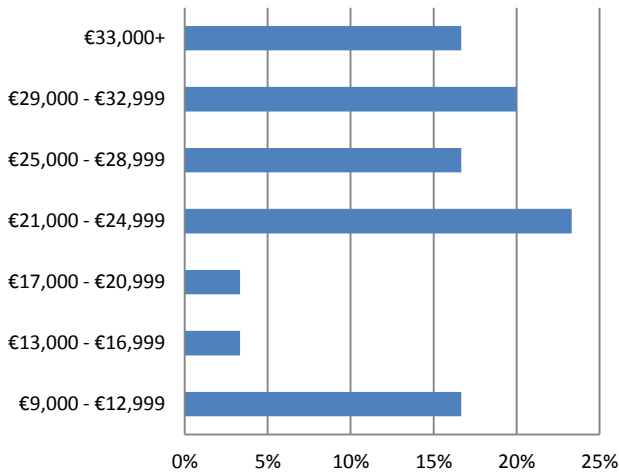

In summary, 64% of graduates of courses within the School are in employment, 19% in further study, 3% have secured an unpaid internship and 12% were seeking employment at the time of the survey. Comparing this to the figures from the last number of years, the statistics appear to be holding steady with only slight fluctuations from the 2010 figures when 62% of graduates were in employment and 16% seeking employment. Perhaps this is reflecting the slightly more buoyant jobs market this year. The numbers seeking employment has fallen by 4% since 2010 which is the first fall in this number since 2008.

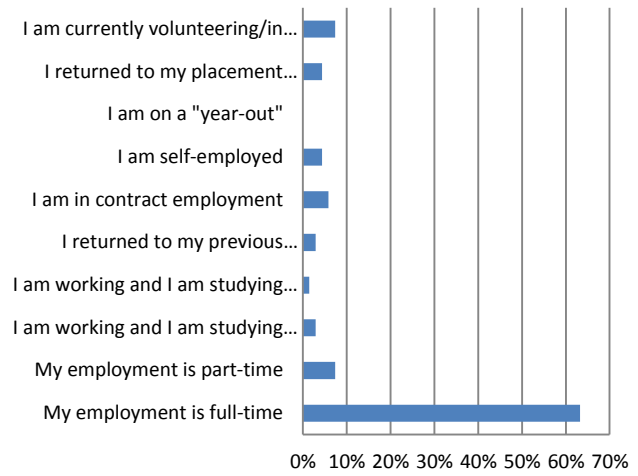

Of the class of 2011 there remains a high number securing employment overseas. 29% of LIT graduates from the School of the Built Environment have travelled overseas to gain employment, holding steady to the 27% who sought employment overseas in 2010. Graduates are gaining employment in countries such as Canada, the US, New Zealand, Australia and the UK.

Salary

Nature of Employment

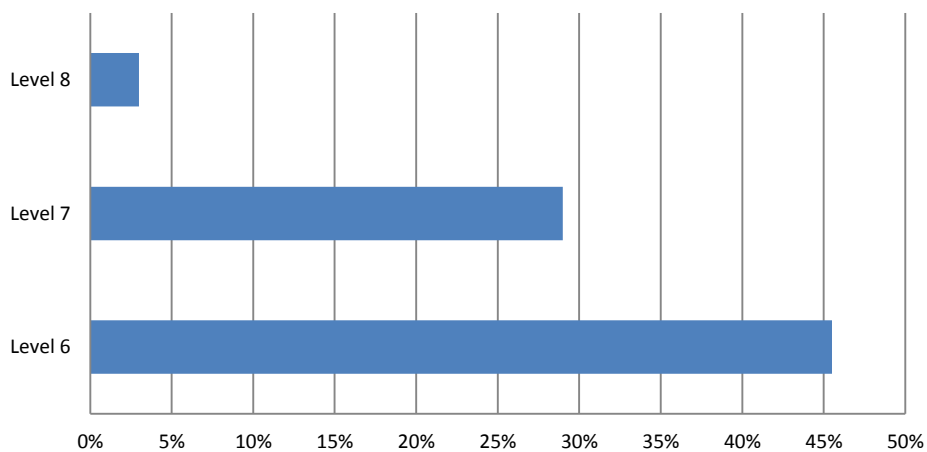

Of those who have secured employment from the School of the Built Environment, 17% have continued to enjoy starting salaries in excess of €33,000 per annum. In fact, the majority of graduates (77%) across the school are achieving starting salaries of €21,000+ in line with average salaries in other disciplines.

1.2 Progression within the Institute

There is an environment of progression within LIT and this is reflected in the statistics in this report. A large proportion of students of Level 6 & Level 7 students continue in the Institute. This figure has increased year on year since 2007.

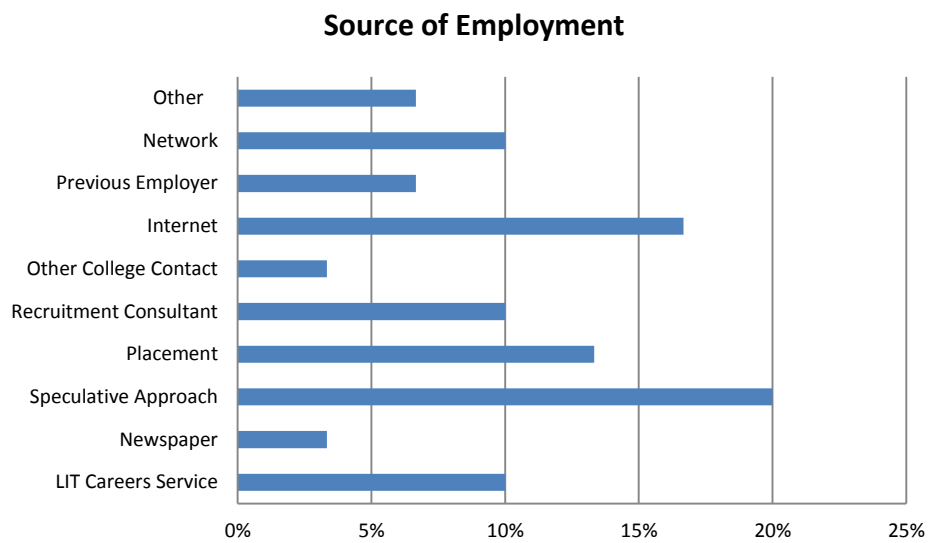

Progression within the Institute School of the Built Environment

1.3 How do Graduates source employment?

In terms of sourcing their graduate employment, graduates have yet again been resourceful and one of the most common sources of graduate employment is by making speculative approaches to employers, a trend reflected across all Schools. 20% of graduates sourced their employment by approaching employers directly while a further 24% stated the source as “other” i.e. through friends, family and networks.

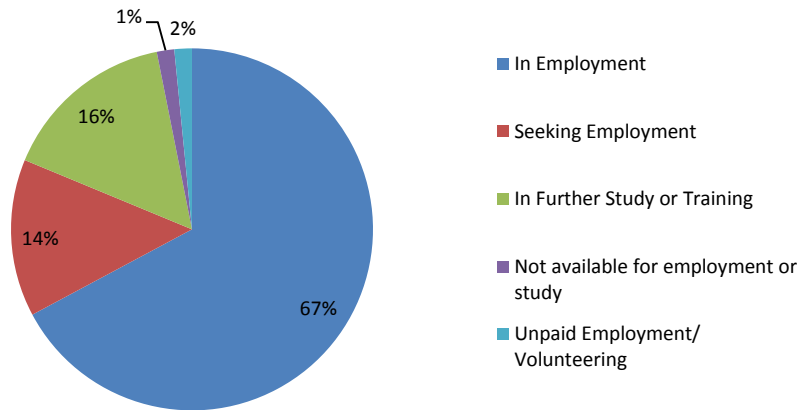

13% of graduates returned to their placement employer, underlining the value of this relationship and a further 10% sourced employment through the LIT Careers Service.

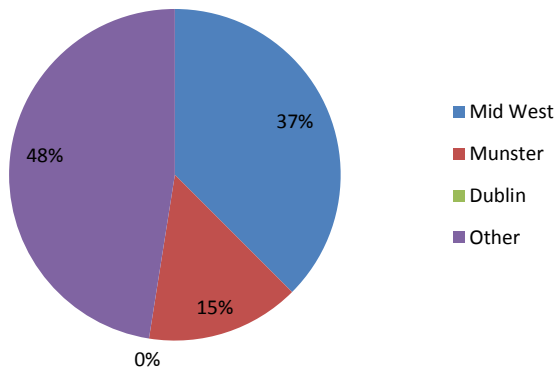

All Programmes Overview

2.0 Department of Built Environment Management

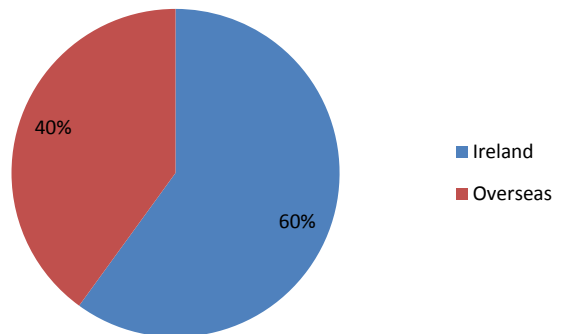

Present Situation

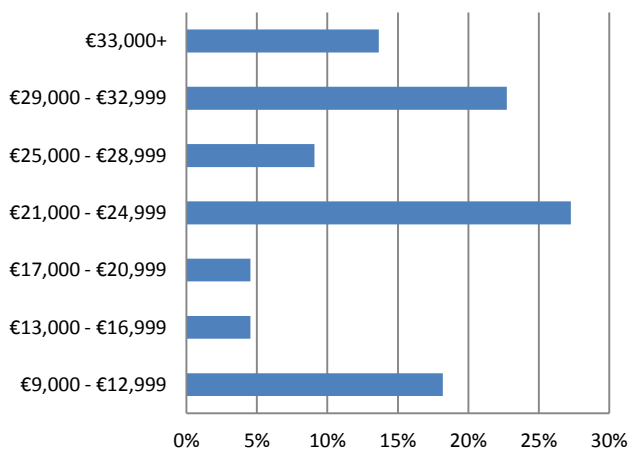

Location of Employment Region

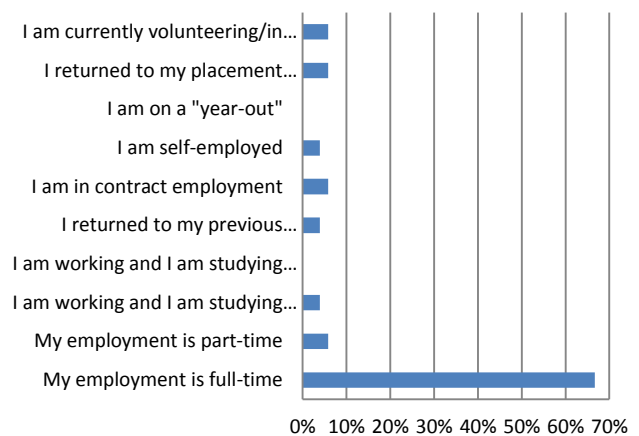

Location of Employment Ireland vs Overseas

Salary

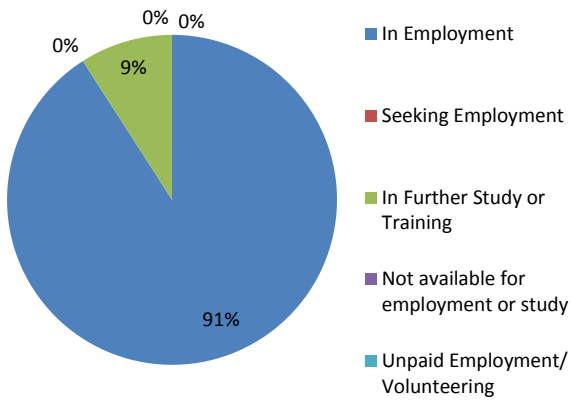

Nature of Employment
