Salaries

93% of LIT graduates from the School of the Science, Engineering & IT have remained in Ireland with 52% of those employed within the Mid West Region.

Salaries of graduates from the School range primarily from €17,000 to in excess of €25,000 with the majority earning between €17,000 & €20,999 per annum. This average starting salary has decreased last year reflected the difficult economic climate.

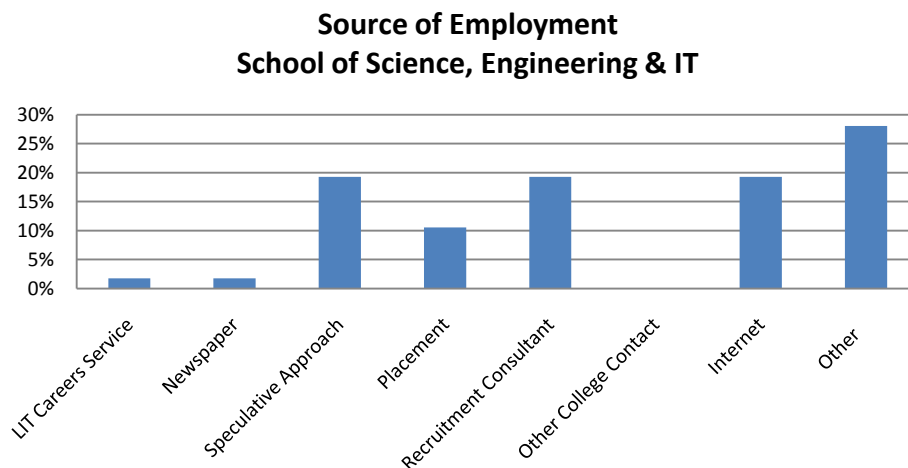

1.2 Progression within the Institute

There is an environment of progression within LIT and this is reflected in the statistics in this report. A large proportion of students of Level 6 & Level 7 students continue in the Institute. Indeed, within the Department of Electrical & Electronic Engineering there is 100% continuation from Level 6 programmes and the overall number continuing above Level 8 within the Institute is over 2%. This very much reflects the national trend for postgraduate study and the fact that 18% of graduates of this school continued with further study in other institutions also. Within the School of Science, Engineering & IT the progression statistics are as follows:

- 84% of Higher National Certificate (Level 6) continued
- 63% of Bachelor Degree (Level 7) continued
- 2.5% of Honours Degree (Level 8) continued

1.3 How do Graduates source employment?

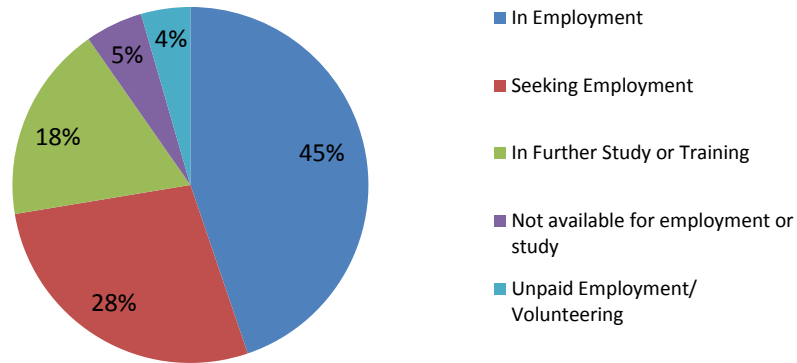

In terms of sourcing their graduate employment, graduates have been resourceful and the most common listed source of graduate employment within the School of Science Engineering & IT is “Other” & “Speculative Approach to Employers”. These figures combined, 48%, is reflective of the changing nature of the jobs market and the much referred to “hidden jobs market”. Many graduates are utilising the networks surrounding them to source suitable employment, a trend reflected across the market, not only in graduate employment. This included returning to part-time employers, working in family businesses and sourcing employment through existing networks such as family friends. 19% sourced employment with the assistance of Recruitment Consultants and a further 19% utilising the Internet.
